# **MicroW XL Bendable 2mm**

Temperature data logger from -40°C to 250°C (standard calibration from 25°C to 140°C, calibrable from -40°C to 250°C, only the probe will resist above 140°C) with 30 cm bendable probe, 2 mm diameter (first and last 30 mm cannot be bent). Battery is user replaceable and the data logger is provided with a National Reference traceable cetificate on 6 points.

Note: if used below -30  $^{\circ}\text{C}\text{,}$  battery life will be highly reduced.

#### Main features

- With bendable cable to place the device near the packages instead on top and with rigid probe for penetration
- Completely food grade and waterproof
- All software calculate lethality value (F0, PU, A0 ecc.)
- Low battery consumption for an extended battery life
- User replaceable battery (software shows battery status)
- Very easy to deploy in any type of package
- Reference traceable calibration certificate included
- Available extended calibration from -40°C to 250°C (order extra calibration points; in case of wide calibration range the accuracy might be worse. Request the possible calibration ranges in advance)
- Heat protections available for use above 140°C

#### **Plus**

- Extremely high accuracy and precision: with an accuracy of ± 0,1°C these devices can be employed in any application involving pharmaceuticals, validation, laboratory and medical field
- High accuracy even outside the calibration range
- Fast response time thanks to the 2 mm diameter probe
- Easy to use even in small and narrow places thanks to the bendable probe
- Printed reports compliant with health regulations and ISO (data are not editable in the software)
